AALS Phase 1 Retrospective

Plans for the next Phase

- Tools
  - Add CodeSense to Github for automated metrics
  - Add a burndown chart for better traceability
  - Dispense with C++ implementation entirely
  - Move to Dev solely in Intellij, dispense with Arduino IDE and Visual Studio Code
  - Add Java Doc
- Methodologies
  - Code front end in java by building a slimsgate plugin which pulls data from each individual sensor using HTTP Get request
  - Create a Test Plan
  - Test Edge Cases and Invalid Input
  - Implement Xray testing to provide a means of User Experience Testing
- Discipline
  - Continue with current approach
- Process
  - Continue with current approach
- Team
  - Continue with current team
